

ASKARI CEMENT LIMITED NIZAMPUR

UPGRADATION OF CEMENT PLANT

Prequalification of Contractors

Askari Cement Limited Nizampur (ACL-N) situated at village Kahi, District Nowshera KPK Pakistan, is a double line cement plant installed by CBMC and designed by TCDRI China. First line was commissioned in 1996 and second in 2003. The plant was originally designed for production of 2 x 2000 tpd clinker.

Capacity of both the lines was enhanced to 2 x 2500 tpd clinker in 2006. Presently both the kilns are in operation at 2700 tpd each. However, there remained certain imbalances in Crusher Area, Raw Materials Extraction, Proportioning & Blending, Clinker Cooler, Cement Mills and Packing Areas, which are hurdle in consistent operation of the plant at 2700 tpd clinker. The proposed plant up-gradation should be conducted by using latest available techniques of world renowned manufacturers.

Applications are invited from potential cement plants up-gradation contractors for complete design & engineering, supply (local, imported, 3rd country/ party equipment if any), transportation, Civil Works, mechanical & electrical erection, installation, instrumentation & interfacing with existing PLC / DCS, detailed technical drawings & layouts, manuals (maintenance, operation & safety), 02 years spare parts for respective plant maintenance, testing and commissioning of its proposed equipment & proposed up-gradation including all the guarantees/ warranties. The prequalified contractors will be sent Request for Proposal (RFP) in due course of time for submission of detailed technical & financial proposals for the award of contract on turnkey EPC basis.

Applications are invited for up-gradation of cement plant from potential contractors. Interested firms / companies should submit their prequalification documents in English, comprising the following:

- a.** Detailed company profile including a description of the company's activities, all the previous projects undertaken and clientage list.
